

Kit 412 - ResQmax Swift Water / Messenger Line Kit

NSN: 1095-01-599-7189

Description:

The ResQmax Kit 412 is the Swift Water / Messenger Line Throwing supplied with two payloads and all the accessories required to operate your ResQmax. This line can be used to tow larger, stronger ropes across a river or other fast moving body of water.

The Polyspectra Line has a stronger test strength of 2200lbs / 998 kg and is intended to be used in water-based operations which require the line to float. This line, when coupled with the Sling Projectile, becomes an effective way to assist a distressed swimmer who may be caught in strong currents by delivering the ResQmax Sling within seconds. The Auto-inflating Sling has a mechanism which inflates the sling on contact with water.

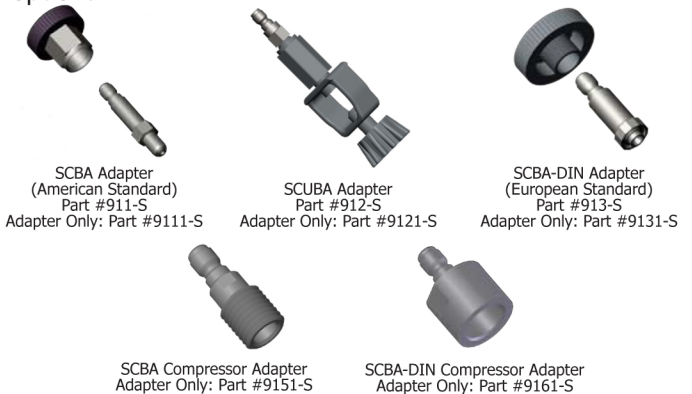

The ResQmax Streamline Filler Hose facilitates charging the Projectiles with compressed air from an Air Compressor, a SCBA Tank, or a SCUBA Tank. The service pressure of these Projectiles is 3,000psi / 207 BAR.

This kit comes complete with spares and a Kit Carry Bag for easy carrying. Optional accessories include the ResQmax Tool Kit and a Rigid Transport/Storage Case. Additional projectiles and lines are available with all of the ResQmax Kits.

Shipping Dimensions: 25" x 21" x 14" - 33lbs

Adapter Choices for ResQmax Product Line:

Please choose from the fittings below for your filler hose options:
