SAFE GRIP 3

New protective gloves for fire fighters

Safe and cut-resistant.

The new glove complies with immediate effect with EN 388 Level 4 for cut-resistance. The reason for this is the new reinforcement material which is silicone-carbon coated and contains a new admixture of mineral components. This gives the SAFE GRIP 3 even better mechanical protection properties and improved cut resistance.

The innovative reinforcement material also ensures an improved tactile experience and thus a more precise grip when you need to grab hold of something.

Reflective elements for improved visibility.

The reflective stripes have been thoroughly revised for the SAFE GRIP 3. Generous 5 cm yellow/silver/yellow reflective stripes at the cuff ensure improved visibility.

For the first time, the SAFE GRIP 3 additionally uses reflecting silver piping on the back and on the finger folds. For the SAFE GRIP 3 in dark blue finger joint folds are colored in red, for the yellow gloves finger joint folds are colored in black.
