

HEROS-xt

Structural fire fighting helmet

Meets NFPA 1971, 2007 edition
2013 edition pending

■ Helmet Features

1 Size adjustment from outside
Adjustments can easily be made while wearing gloves.

2 Helmet flash light (optional)
Revolutionary helmet flash light (optional), detachable for use as hand flash light explosion proof Ex II 2GE-xibIICT4, LED operated by 3 batteries AAA (included).

3 Eye protector and face shield
Integrated tilt-up eye protection (optional) and face shield.

4 Chinstrap
Ergonomic, 3-point chinstrap for perfect fit and stability.

5 Neck protection/ear covers
Neck protector made of heat and flame resistant material.

6 Additional side and neck protection.

Integrated LED flash light

An option available on the HEROS-xt helmet is the LED light. This light securely attaches to the front of the helmet, directing the light in the direction of wearers eyes and offers less chance of entanglement.

HEROS-xt

The safest helmet in the fire industry

Comfort and safety under extreme conditions

- New design provides for maximum safety and outstanding comfort
- Padded ratchet system for increased comfort
- Better balance for less neck and shoulder strain
- Integrates well with all SCBA facepieces

It's time to put safety and comfort ahead of tradition

The extension of the helmet along the side of the wearers head provides additional protection in a critical area. This design reduces the severity of any side impact.

- Helmet profile provides increased side impact protection
- Reduces chances of entanglement in confined spaces

■ Additional side and neck protection
