

SHELTER MK II

The maintenance shelter MK II is designed to be set up on almost any terrain without any mechanical aids.

The tent is kept inflated using controlled electrical blowers.

Special feature is the 'eye lid' door on both ends. It allows leaving and entering of planes, helicopters, big trucks, etc.

Closed it enables personnel to work in a dry environment – free from rain and wind.

FEATURES

- Heavy duty
- Automatic pressure control
- 140 kg/m² snowload
- Setup time: 2 hours with 6 people only
- Can be setup on almost any terrain
- Sand bag anchoring system
