

Screen setup

- 1 Place the screen on the floor with the hinges and fiberglass rods facing upwards.

- 2 Place your foot on the black strap in order to hold the screen in place. Hold one of the bottom fiberglass rods and place your hand on the hinge. Push the hinge through the resistance in order put tension on the screen.

- 3 Screen has tension.

- 4 Erect the screen moving the outer segments slightly inwards.

Screen take down

- 1 Place your foot on the black strap. Hold the top fiberglass rod close to the hinge. Place your hand in the top middle part of the screen. Push your hand forward and pull the fiberglass rod backwards.

- 2 Repeat step 1 for all four segments.

Different screen setups

- 1 Single screen setups.

- 2 Multiple screen setups.
